Amendments to the Specification:

Per the Examiner's request, please amend the abstract of the disclosure as follows:

An elongated flexible lighting system according to the present invention emprises includes an array of light sources that are illuminated by electric power. It further emprises includes an elongated translucent extrusion of flexible material. The array of light sources is integral to the extrusion with said extrusion transmitting and dispersing the light from the array such that the lighting system gives the appearance that the array of light sources is a continuous light source. The elongated lighting system can be used for many different applications including, but not limited to, the lighting of structural features and illumination of sign features.

Per the Examiner's request, please amend the sentence beginning on line 10 of page 8 of the disclosure as follows:

"The printed circuit assembly 14 can be mounted vertically within longitudinal cavity 16 and can hold light sources 14 15 (shown best in FIG. 2) directed up toward the top rounded surface 18 of the extrusion 12."
